

As of November 1, second grade student, Robert Palumbo, has earned an impressive one hundred AR points. The year end goal for second grade, and all of elementary, is fifty points and in three months he has doubled that. Robert has set a goal for himself for two hundred fifty for the end of this year. At the rate he is going, he will surely exceed his goal! Robert has already read eighty eight books and we're not even halfway through with the 2024-2025 school year! We look forward to seeing Robert and many other students achieve their AR goal!
